Type of Charge Point Required:

Charging Time¹ Table Vs Power Needed

HRS	Phases(s) ²	kW	Amps
6	1	3.7	16
3.15	1	7	30
1	3	22	30

Charge point selected:

1. If you have a single (1) phase supply then your building will not support the installation of a 3 phase charger
2. This is an indication only, actual time will vary by vehicle type and battery charge state at the time of the charging session

About Your Site:

What vehicle(s) will be charged on site?

Will any excavation or trenching work be required? If yes please provide estimated distance.

What is the estimated distance between your consumer unit and the proposed charger location?

Do you have a spare way available in your consumer unit?

Once completed please email your form, a photograph of your desired charge point location and a photograph of your consumer unit to info@caplor.co.uk
